Please address all correspondence to Chief of Police - Garry Hull

## MEDIA RELEASE

Over the past 2 weeks the Gananoque Police Service has received multiple incidents of a person(s) attempting to pass counterfeit \$100 US currency at local businesses. We remind businesses to be vigilant when accepting any large denomination currency.

Counterfeit Prevention Resources including training materials can be found at: <https://www.bankofcanada.ca/banknot.../counterfeit-prevention/>

Know Your Money

**2004 style** Federal Reserve notes (FRNs) incorporate background colors and large, borderless portrait images.

**Paper** U.S. currency paper consists of 25% linen and 75% cotton and contains small randomly dispersed red and blue security fibers embedded throughout the paper.

**Portrait** The 2004 style FRNs have an enlarged and off-center portrait without a frame.

**1 Watermark** The 2004 style FRNs have a watermark that is visible from either side when held to light.

**2 Color-Shifting Ink** The 2004 style \$10, \$20, \$50 and \$100 FRNs have color-shifting ink that shifts from copper to green as the note is tilted 45 degrees. The 2004 style \$100 FRN has a color-shifting "Bell in the Inkwell". The \$5 FRN does not have color-shifting ink.

**3 Security Thread** All genuine FRNs, except the \$1 and \$2, have a clear thread embedded vertically in the paper. The thread is inscribed with the denomination of the note and is visible only when held to light. Each denomination has a unique thread position and glows a different color when held to ultraviolet (UV) light.

**4 3-D Security Ribbon** The 2004 style \$100 FRN features a blue ribbon woven into the paper. When you tilt the note back and forth, the bells and "100"s move side to side. If you tilt the note side to side, they move up and down.

**5 Serial Numbers** The first letter of the serial number on FRNs of series year 1996 or later corresponds to the series year.  
 E = 2004      I = 2005      L = 2006A  
 G = 2004A      J = 2009

**Bank Indicators**

**6 Federal Reserve Indicators** The 2004 style FRNs have a letter and number designation, which identifies one of the 12 distributing Federal Reserve Banks. This letter and number designation appears beneath the serial number on the left. The number corresponds to the position of the letter in the alphabet, e.g., A1, B2, C3, etc. The letter matches the second prefix letter in the serial number.

**7 Note Position Letter and Number**

**8 Face Plate Number**

**9 Series Year**

**10 Back Plate Number** (Not shown) Found on the bottom right-hand corner of the back of the note.

**2004 style \$100 note issued October, 2013**

Under a UV light source, the security thread glows light red/pink.

**2004 style \$50 note issued October, 2004**

Under a UV light source, the security thread glows yellow.

**2004 style \$20 note issued October, 2003**

Under a UV light source, the security thread glows green.
